PROJECTS

Cult.fit clone

Fitness megastore platform Cultfit using MERN stack as a part of learning curve in Masai School.

Features:

- End-to-end product purchasing flow within the "store section".
- Buying subscription and booking a trial workout session from cult.fit.

Tech Stack: CSS | React | Node | Express | MongoDB

Areas of responsibility:

- Developed end-to-end product purchasing flow within the "store section".
- Contributed to database and logic integration for the user experience and fetching products from the backend.
- Integrated with the backend using MongoDB

A collaborative project, built in 5 days by a team of 4 developers and 2 designers.

E-Commerce

An Ecommerce website with admin & user Interface.

Features:

- Sign-in, sign-up, update Profile, Reset Password & Change Password
- Search, Filter & Pagination
- An admin dashboard and sales report chart so that it is easier for the seller to manage their inventories and orders.
- Allows the sellers to save, retrieve and delete data like products, orders and buyers/users and the buyers to select items, save shopping carts and complete payment.

Tech Stack: CSS | React | Node | Express | MongoDB | Redux

A Solo project developed in a month.

Covid-Stats

An overview of the damage caused by Covid-19 in the form of maps and charts.

Features:

- Select a country by clicking on map
- Number of cases country-wise sorting option
- Decent UI

Tech Stack: SCSS | React

A solo project developed in a day.
